- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers a period of seven years has been identified as the time frame within which to discharge the obligation

BID SPECIFICATIONS

1. NAME OF THE PROJECT

Review of Capricorn District Municipality (CDM) Spatial Development Framework (SDF).

2. INTRODUCTION

Section 26(e) of the Local Government: The Municipal Systems Act (MSA), No.32 of 2000 requires all municipalities to compile Spatial Development Framework (SDF) as a core component of the Integrated Development Plan (IDP). Chapter 4, Section 12(1) of the Spatial Planning and Land Use Management Act (SPLUMA), No.16 of 2013, also requires each municipality to prepare an SDF to guide overall spatial distribution of current and desirable land uses within a municipality.

A Spatial Development Framework is the long-term development plan for a municipality and is a core component of the municipality's 5-year IDP. The SDF must be reviewed every 5 years in order to align with the IDP, relevant national and provincial policies and local municipal SDFs. The current SDF for CDM was adopted by Council in May 2017. This review is necessary to address both legislative requirements and changing circumstances.

The reviewed SDF must comply with the provisions of SPLUMA 2013, MSA 2000, the Department of Agriculture, Land Reform & Rural Development (DALRRD) SDF's Guidelines of 2017 and must be consistent with the Provincial and National SDFs.

CDM requests the services of a multi-disciplinary and suitably qualified firm to review the Capricorn District Municipality SDF (DM SDF), 2017 within a period of eighteen (18) months.

3. PROBLEM STATEMENT

SPLUMA provides for the compilation of the Spatial Development Framework that directs the municipal development objectives and development visions towards the required spatial vision.

The current CDM SDF was developed in 2017, which renders many of the analysis and status quo of the district outdated as many catalytic interventions and programmes unfolded in the district since then. The CDM SDF Implementation Framework also need improvement.

Apart from the outdated status of the CDM SDF, alignment with the latest National and the Provincial SDF needs to be done as the current CDM SDF have been completed prior to the completion of the National Spatial Development Framework (NSDF) and Provincial Spatial Development Framework (PSDF).

The review of CDM SDF will also assist in accommodating the District Development Model (DDM) One Plan which the municipality succeeded to develop. The DDM consists of a process by which joint and collaborative planning is undertaken at local, district and metropolitan by all three spheres of governance resulting in a single strategically focused Plan for each of the 44 districts and 8 metropolitan geographic spaces in the country, wherein the district is seen as the 'landing strip'. The review of the CDM SDF will provide the opportunity to promote the alignment of all the current government initiatives also included in the One Plans to ensure that the District is optimally positioned to plan for the future and execute it mandates.

4. OBJECTIVES

- The overall objective of the project is to review the CDM SDF in order to diagnose the current status of development, to define the vision and objectives for spatial development, and translate them into an executable document that could be monitored and evaluated.
- To create a credible, legally compliant and sustainable SDF for the Capricorn District Municipality.
- In order to align with the provisions of Section 21 of SPLUMA, a Credible Municipal SDF must therefore:
 - (a) give effect to the development principles and applicable norms and standards set out in Chapter 2;
 - (b) include a written and spatial representation of a five-year spatial development plan for the spatial form of the municipality;
 - (c) include a longer term spatial development vision statement for the municipal area which indicates a desired spatial growth and development pattern for the next 10 to 20 years;
 - (d) identify current and future significant structuring and restructuring elements of the spatial form of the municipality, including development corridors, activity spines

- and economic nodes where public and private investment will be prioritised and facilitated;
- (e) include population growth estimates for the next five years;
 - (f) include estimates of the demand for housing units across different socioeconomic categories and the planned location and density of future housing developments;
 - (g) include estimates of economic activity and employment trends and locations in the municipal area for the next five years;
 - (h) identify, quantify and provide location requirements of engineering infrastructure and services provision for existing and future development needs for the next five years;
 - (i) identify the designated areas where a national or provincial inclusionary housing policy may be applicable;
 - (j) include a strategic assessment of the environmental pressures and opportunities within the municipal area, including the spatial location of environmental sensitivities, high potential agricultural land and coastal access strips, where applicable;
 - (k) identify the designation of areas in the municipality where incremental upgrading approaches to development and regulation will be applicable;
 - (l) identify the designation of areas in which—
 - (i) more detailed local plans must be developed; and
 - (ii) shortened land use development procedures may be applicable and land use schemes may be so amended;
 - (m) provide the spatial expression of the coordination, alignment and integration of sectoral policies of all municipal departments;
 - (n) determine a capital expenditure framework for the municipality's development programmes, depicted spatially;
 - (o) determine the purpose, desired impact and structure of the land use management scheme to apply in that municipal area; and
 - (p) include an implementation plan comprising of—
 - (i) sectoral requirements, including budgets and resources for implementation;
 - (ii) necessary amendments to a land use scheme;
 - (iii) specification of institutional arrangements necessary for implementation;
 - (iv) specification of implementation targets, including dates and monitoring indicators;and
 - (v) specification, where necessary, of any arrangements for partnerships in the implementation process.
